"My Heart Would Palpitate, I Had Weak Spells"

Mrs. L. Whiting, 202 King St. West, Brockville, Ont., writes:

"I took very sick with my nerves and stomach, and seemed to be all run down. At times my heart would flutter and palpitate so and I would take such weak spells in the pit of my stomach. At such times I would think I would never get better. I had almost given up hope when a friend advised me to take Dr. Chase's Nerve Food. I did not stop until I had taken twenty-five boxes. It has done wonders for me and I am well and ready to resume it to everyone."

DR. CHASE'S NERVE FOOD
50 Cents a box, all dealers, or Vancouver, Vancouver & Co., Ltd., Toronto

The Need For Immigration

The drop in immigration during 1932, when only 75,000 people entered Canada, as compared with 1931 when 90,000 entered, means that during the year the new increase in the home market, some 25 per cent, in the value of Canada's export trade in 1932, which was approximately \$2,000,000,000.

This may be a new way of measuring the value of immigration but it is probably the most accurate that could be devised. "Without being in the least degree of exaggeration," says the Canadian Immigration Service, "it is admitted that it is secondary to that of the internal trade of the country. If Canadian mercantile interests last year had had the two-million worth of business to handle, they would have experienced the slackest year on record. Any increase in business contributed to the improvement in conditions. The increase in the value of the country's exports was approximately \$2,000,000,000."

A country's production is sufficient to demonstrate the obviousness of this statement. Going back to pre-war years it will be agreed that from 1900 to 1914 the increase in the value of the country's exports was approximately \$2,000,000,000. This was not a very large increase. During this period the cost of exports rose never higher than \$20,000,000, which they reached in 1912.

Business was quiet and prosperity marked because during those years, Canada received 2,000,000 immigrants. In most of those years the average net immigration was 125,000, and in 1912 the number was 253,227. It was the swelling of these people, the greater percentage of whom went to the land, and this needed large quantities of goods of every kind, that made the difference. Here was as many as 250,000 new customers being brought to our mercantile interests, and the value of the country's exports was increased by the very little to get this new business; in reality it was the cheapest business that our merchants ever got. In the train of this great stream of immigration followed building materials, machinery, and a huge trade from which everybody benefited.

It may be asked, how are these conditions as to the value of immigration to the country affected? So absolutely accurate figures as to the value of the internal trade for a given year are available, but an estimate made by the Dominion Statistics, which is the House of Commons during 1932, placed the value of Canada's production in 1931 at \$2,521,486,000, and it was expressly added that this figure did not include several very large items. It is accordingly here generally assumed that 1931 was an average year. Decision runs about \$2,000,000,000 a year.

In the supply of goods, there is no demand, any surplus of goods during any year is not demanded, and it may be taken for granted that the total production plus the imports and minus the exports represents the value of the internal trade of the country. The House of Commons during 1932 placed the value of Canada's production in 1931 at \$2,521,486,000, and it was expressly added that this figure did not include several very large items. It is accordingly here generally assumed that 1931 was an average year. Decision runs about \$2,000,000,000 a year.

Assuming that the per capita purchasing was \$600 a year, then when 400,000 immigrants entered Canada within a twelve month, as they did in 1931, the new business they brought was worth \$240,000,000 a year to the country. The 75,000 who entered in 1932 thus brought only \$200,000,000 of new business. Taking it for granted that the net business is no more than the average person, which, of course, is a very liberal estimate, the difference between the two foregoing totals, or over \$200,000,000 represents the yearly loss to Canadian business through the decline in immigration from its high point in 1931.

If anything, this is a considerable understatement of the loss, those who settle on land, which the greater number of immigrants would do, belong to the less favored purchasers of general goods. If the average settler bringing on the prairie is worth over \$700 a year to the railways, as is claimed, then 200,000 immigrants would be worth double that to the business interests of the country. That the estimate of loss to under the mark is further evident from the fact that the average loss to settlers under the Soldier Settlement scheme is \$100, and certain claims are made to \$27,000.

Much is naturally made of the fact that Canada, as a result of last year's crop, had \$200,000,000 of wheat for export, which should bring in approximately \$200,000,000, but it is to be noted that this is the wheat that can't wait the business interests of the country are being during the course of a year. The wheat that is sold in the country is worth much more than the wheat that is sold in the country. Canadian business men were as busy as bees when the country only exported \$200,000,000 of products a year, the reason being that they then got, through immigration, as few there as now, some business in wheat within a twelve months, as they now get.

Many Railway Accidents An Angry Bull

Railway Commission: Furnishes Information on Subject
Railway accidents in Canada during December last, as reported by the Railway Commission, accounted for 38 deaths and injuries to 237 persons. The number of deaths was 38, as compared with 40 in the corresponding month of 1931. The number of injuries was 237, as compared with 240 in the corresponding month of 1931. The number of deaths was 38, as compared with 40 in the corresponding month of 1931. The number of injuries was 237, as compared with 240 in the corresponding month of 1931.

Accidents at railway crossings caused two deaths during December and 21 injuries. In 21 previous years, crossing accidents caused 21 deaths and 17 injuries.

Hilgert, records that six Walter Raleighs are paid 50 cents a week for a pair of shoes, the equivalent of about \$100 today.

Rare Owl In London Zoo

Snowy Bird Was Caught by Vessal in Mid-Ocean

A money owl captured on board a vessel from London to New York has reached the London zoo.

There was once in the gardens a specimen of this large owl. The bird was taken from 700 miles from shore.

One hundred miles from shore, the bird was taken from 700 miles from shore. The bird was taken from 700 miles from shore.

What is now interesting to note, however, is that, save for his face, the bird is a perfect replica of the bird which was taken from 700 miles from shore.

The bird is a perfect replica of the bird which was taken from 700 miles from shore. The bird is a perfect replica of the bird which was taken from 700 miles from shore.

The bird is a perfect replica of the bird which was taken from 700 miles from shore. The bird is a perfect replica of the bird which was taken from 700 miles from shore.

Co-operative Marketing Plan

Claim Made that Farmers Can Save Money by Marketing Cattle on Co-operative Basis

"Producers of livestock in Western Canada can save hundreds of thousands of dollars annually by marketing their cattle on a co-operative basis," the Saskatchewan Union of Growers' convention was told by C. H. Jones, general manager of the United Grain Growers.

"The producers," he says, "should have a co-operative scheme for the control of their product in a point closer to the consumer."

Mr. Jones explained the co-operative plan of co-operative cattle marketing, which his company already is putting into operation. To get best results, he said, at least 60 per cent of the producers must be organized through the farmers' own organization.

The United Grain Growers were looking into the possibility of co-operative shipping of livestock to Western Canada, the market nearest to be looking up. The convention endorsed unanimously the principle of the plan by resolution.

Market For Canadian Grain Expanding As World Shortage Of Wheat Becomes Evident

One of the curious phenomena noticed in the United States, and often commented upon, is the fact that wheat, which has reached year by year as the fertility of virgin soil was exhausted and more diversified and intensive farming was adopted.

It may be that some of the wheat grain, growing directly in Saskatchewan have come to the inevitable stage of exhaustion—indeed, the fertility of the soil of farming, strenuous cultivation, following, summer cultivation, crop rotation, etc., are being slowly adopted, though the process is not profitable in growing wheat in competition with virgin land.

Yet the market for Canada's grain is expanding. Again has just set an easy to make arrangements for the shipment of Canadian grain to that country, recently industrialized, and representing an enormous potential in consumption.

It is a stupor thing that which is the cause of the demand for grain in the United States, and which is growing in such climate except the Arctic—the northern limit for wheat crops has not been reached, and it goes down almost abrupt even in equatorial regions.

Another remarkable thing about wheat was discovered during the past season, when one crop was harvested in the face of greatly disturbed European conditions. It was carried last to good, if somewhat lower bulk than gold. The British exporters simply harvested one wheat in Europe last year. They did not pretend to sell it for money. The depreciated and shaky state of the European currency made the risk too great, so the wheat, British supply found no market, and was sold for a small amount of money.

By this harvesting process the price of the wheat has remained at a fairly steady level in spite of the Arctic European money conditions.

The Canadian Pacific Railway WILL FIND

Farm Help for Western Farmers

TO BE OPENED in Western Canada, the Canadian Pacific Railway is to be opened in sections commencing from both the Canadian Pacific Railway and the Great Northern Railway, and the Canadian Pacific Railway is to be opened in sections commencing from both the Canadian Pacific Railway and the Great Northern Railway.

THE GOVERNMENT of the province also mentioned have expressed their willingness to co-operate in the construction of the railway, and the Canadian Pacific Railway is to be opened in sections commencing from both the Canadian Pacific Railway and the Great Northern Railway.

Everyman's Sanatorium Fund

Five Tubercular Women Are Now Receiving Treatment at Expense

Through the energetic help of many friends of the Saskatchewan Anti-Tuberculosis League, the Everyman's Sanatorium, Pundit, has been able to receive five tubercular women, who are now receiving treatment at the expense of the \$20,000 fund.

All men and women who feel an anxiety to have the death rate in the province reduced, should be down are invited to join in the movement. The fund is now open for free care for one year of 50 tubercular women who have no means of getting to a hospital and would be forced to stay home while the disease grew and while their children were in constant danger.

Gifts for help in this work may be sent to Mr. B. H. Bates, 208 A Avenue Street, Regina; to The Ladies Publishing Company, Regina; to The Times, Moose Jaw; to The Canadian Business Manager, Saskatoon; to The Canadian Press, Winnipeg.

The Ladies Publishing Company, Regina; to The Times, Moose Jaw; to The Canadian Business Manager, Saskatoon; to The Canadian Press, Winnipeg.

Exporting

A considerable export poultry trade has been developed by the farmers in Saskatchewan during the last few years. During the period between 1911 and 1912, there were fifteen per cent of poultry shipped from the province, according to recent government statistics. Of the estimated total production for the whole of Canada, the Saskatchewan produced 45,000,000 birds.

It is a stupor thing that which is the cause of the demand for grain in the United States, and which is growing in such climate except the Arctic—the northern limit for wheat crops has not been reached, and it goes down almost abrupt even in equatorial regions.

Auturians in England

Most of them have money invested in Britain.

Auturians, writers and barbers, who are to be seen in the streets of London, are thought to be the first of their kind in the world. They are thought to be the first of their kind in the world.

TOWN AND DISTRICT

Steve Siga is happy over the arrival of a fine baby boy at his home at Sherston in Monday, March 5th.

Mrs. Thomas Burns has taken to a Calgary hospital last Saturday in a very critical condition, which Dr. Boyles believes to be sleeping sickness.

Jack J. Robinson was again to Calgary Friday night very ill and has since been successfully operated on for appendicitis, and latest reports are that he is improving nicely.

Geo. Matthews says he is getting splendid results from his ad. in the Call, and finds so long as he gives his advertising the proper attention required it is a paying proposition. Ask him.

An important auction sale of horses and farm implements will be held at Jos. Dejarjine's farm on Wednesday, March 21. Read the ad in this issue.

Bisset & Anderson have something to say that should interest every farmer in this issue concerning bread wheat. Read it.

The Women's Auxiliary of St. Andrew's Church will hold a Sale of Plants and Home Cooking in W. H. James' Store on Saturday afternoon, March 17th.

George Farnhamson is all smiles over the arrival of a fine baby boy at the home of Mrs. F. E. Pobst, on March 1st, 1923.

Another of the popular waltz drives and dances is being given at the Living Springs school on Saturday, March 10th. Everybody welcome. Prizes will be awarded for ladies and gentlemen.

Success comes from backbones—not wishbones.

Successful advertising is just talking naturally to your customers.

RESULTS OF HOPPER CAMPAIGN AND NEEDS FOR THE COMING SEASON

A conservative estimate of the increase in value of the Alberta 1922 crop as a result of the success of the campaign against the grasshoppers, is placed at between eighteen and twenty million dollars, according to returns made to the department of agriculture by secretaries of municipal districts, U. P. & A. boards in local improvement districts, and others. E. H. Strickland, professor of entomology at the University, who assisted in the campaign last year, states that even more significant is the fact that the increase in numbers of road-side grasshoppers was almost entirely checked, that in many places the species has been almost entirely reduced in numbers that careful poisoning of the few remaining individuals during the coming spring will terminate the outbreak without further loss of crops.

Lesner Migrator Hopper There is a most disappointing feature, however, Mr. Strickland notes, and that is the fact that the more sandy districts of the infected territory, favored by the hopper, are being invaded by the lesser migratory grasshopper during the later part of the summer. Favored by the hopper, this species laid more than its usual complement of eggs. The area covered by the invasion of this species appears to be the southeastern portion of the province as far north as the Goose Lake line, being especially in evidence in the extensive sandy area north of Medicine Hat and along the line from Hanna to Stonyville.

ARROWWOOD BRIEFS

At the organization meeting of the Buffalo Bill club of the U.F.W.A. last Friday afternoon at the home of Mrs. G. F. Campbell the following officers were elected:

President: Mrs. H. H. McBride,
Vice-President: Mrs. B. B. Jones,
Sec.-Treas.: Mrs. G. F. Campbell.
The following were also elected to constitute the board of directors:

Mrs. R. F. Williams,
Mrs. H. C. Allen,
Mrs. G. F. Kemper,
Mrs. Gaylen Jones,
Mrs. C. H. Baker.

Those who are acquainted with these ladies are preparing a great future for their organization.

Their next meeting is scheduled for Friday, March 10th at the home of Mrs. H. C. Allen. Already the ladies of this organization have challenged the gentlemen of the Arrowwood Lodge of the U.F.A. for a debate, and as they are inviting all ladies of the community to attend the meeting we may expect a large organization.

The Rev. and Mrs. C. G. Lyle spent Sunday at the home of Mr. B. Jones.

Mal Fabian, who has the pig and cake show has taught him a lesson.

Donald Brown has been on the sick list for several days.

FOR SALE — A few well broke work horses, young and sound. Also two Registered Shorthorn Bulls, raising four. These bulls are first class animals bred by the Earl of Winton and Gardner of Leithridge. Will be sold cheap for cash. John Clark, Box 62, Gleichen. 25c

The horse merchant, however, cannot be a success in this way and, as has been said, the majority of them would not do it if they could. The horse merchant if he has not the stock called for, may offer another with the explanation that it is of the same quality as the one for which the customer asked. Good merchants forgers horses to offer something "just as good" to the customer especially when the article called for is one that has become well-known and popular through the advertising done by the manufacturer, but to attempt to make a substitution without the knowledge or consent of the customer! Well, it isn't being done by the local merchants today.

It was a famous showman who declared that the people loved to be humbugged. That saying is many years old now but sometimes it seems that there is about as much truth to it now as there was when it was first uttered.

But there is another class of merchants, of which the same thing cannot be said. A man who has been closely connected with some of the big mail order houses has been asked for the statement that the heads of the various merchandise departments of many mail order houses have standing orders to subscribe to the "Gleichen Call" a man who ordered a dress shirt from a mail order house received a pair of pink pajamas instead.

It is a famous showman who declared that the people loved to be humbugged. That saying is many years old now but sometimes it seems that there is about as much truth to it now as there was when it was first uttered.

FOR SALE—Two Clydesdale Stallions, 3-year-old, rising six years. An AI horse in every respect. Nonpareil Gray, rising three years. A very promising gelding, with lots of size and quality. This gelding was first at Calgary as a yearling, first as a two-year-old, Canadian Champion and Canadian Champion 1922. Apply John Prowse, Cluny. 40
